

Quick-Start Guide

PLANARYSHOP · 2026 BUDGET PLANNER

1

Open the planner in Excel or Google Sheets

Works in Microsoft Excel (2016 or newer) and Google Sheets. In Sheets: File > Import > Upload.

2

Add your income on the Income tab

Type each source of income in the white cells, one column per month. Totals fill in by themselves.

3

Log spending on the Expenses tab

15 ready-made categories. Enter what you spend each month — the beige cells do the math.

4

Set goals in Savings and Debts

Give each goal a target and log what you put aside. Debts show the remaining balance as you pay.

5

Watch the Dashboard come to life

Charts and summary cards update automatically. Check Annual Summary for your monthly savings rate.

★ The golden rule

Only type in the WHITE cells. The beige cells contain formulas — if you overwrite a TOTAL cell, that number stops updating.
